## ABSTRACT:

PURPOSE: To obtain a ground cosmetic, having effects on delicate change of finish such as foundation applied thereon and capable of imparting luster and transparency to finished skin and excellent in effects on appearance of beautiful and natural skin by blending a nacreous pigment with other ingredients.

CONSTITUTION: A ground cosmetic is obtained by blending a nacreous pigment, e.g. platy powder coated with a metallic oxide film, bismuth oxychloride, scaly foil and/or guanine as an essential ingredient in an amount of 1-10wt.%, especially 2-7wt.% based on the total weight of a ground cosmetic for using before coating a makeup cosmetic such as foundation and regulating the skin conditions therein. The above-mentioned ground cosmetic has the aforementioned excellent effects. Furthermore, mica coated with carbon black, iron hydroxide, iron oxide, iron ferrocyanide, chromium mercuride, chromium oxide, tin oxide and/or titanium dioxide, etc., are used as the platy powder coated with the metallic oxide.
